**PROGRAMME DETAILS**

Inter school level competitions are about more than just participation and winning prizes; they can play a major role in uncovering and nurturing natural talents of the students. This is especially true of the art competitions for children and teenager to have a life-changing effect. Drawing and colouring are visual arts and these competitions allow students to uncover their natural talents in sketching and illustrations. Competitions are important to motivate young artists and help them to develop their creative skills by exposing them to the contemporary talent in the field. By observing the work of their peers, students have the opportunity analyze and evaluate their techniques and outcomes vis-à-vis those of other artists. Considering these our school has encouraged our students to participate in drawing competition that was conducted by Gulf Medical University. Six students from grade 10, 11 and 12 exhibited their artistic work at an art gallery in the university.

The university has also organised a session for the students to visit the science exhibitions where exhibits in the form of models and projects of schools of UAE were displayed. Our school has organised in taking grade 10, 11 and 12 students to view the science exhibition to promote interest in Science and Technology among younger generation. This also helps the students get a chance to understand the application or do the practical aspect of the things that they have learned from the classroom.

Our students were also given an opportunity to have an educational visit the anatomy museum of the university, guided by an academic staff.
